MD RAFID MUSHFIQUE

Email: rafidmushfique@gmail.com | Phone: +61 424926475
Github: github.com/rafidmushfique | LinkedIn: linkedin.com/in/md-rafid-mushfique

EDUCATION

Master of Information Technology (Professional Computing)
Swinburne University of Technology Expected completion: end of 2026

Bachelor of Science in Computer Science
BRAC University Completed 2021 | GPA: 3.22 / 4.00

- Relevant coursework: Data Structures, Databases, Software Engineering, Digital Signal Processing, Artificial Intelligence, Neural Networks

RESEARCH INTEREST

- Human-Computer Interaction (HCI) and human-AI interaction
- Emotional and cognitive state detection (stress, cognitive load, attention)
- Wearable, mobile and ubiquitous sensing
- Applied machine learning and large language models (LLMs), including AI for software engineering

RESEARCH EXPERIENCE

Integrated Physiological Signal-Based Biomarkers for Automatic Stress Detection
Undergraduate thesis, BRAC University, 2021
Analysed ECG and GSR data from the AMIGOS dataset, applying signal preprocessing, feature extraction, and machine learning models to infer user stress states.
Available at: http://hdl.handle.net/10361/26970

WORK EXPERIENCE

Software Developer - ACI Limited

- Developed web-based enterprise solutions such as HR management and production management tools.
- Key projects: Yamaha production management system, HR management tool.

Junior Software Engineer - LEADS Corporation Ltd

- Worked on banking solutions and enterprise systems.
- Key projects: production management tools for H&M Bangladesh, Coca-Cola Bangladesh, and Ziska Pharmaceutical; HR management tool for One Bank and LEADS Corporation.

SKILLS

- **Programming:** Python, C#, JavaScript, SQL, ASP.NET Core
- **Machine Learning / Data Analysis:** scikit-learn, ML algorithms (KNN, Random Forest, Logistic Regression), data preprocessing, signal processing
- **Software Development:** REST APIs, Docker, Git, full-stack application development

PROJECTS

- **AI Code Reviewer:** a code reviewer using CodeLlama (7B Instruct) to review uploaded code against a PDF of coding rules/standards. github.com/rafidmushfique/AI-CodeReviewer
- **Campus Compass:** a locally-run AI search and question-answering tool crawls specified web pages, indexes content with embeddings, and answers questions via retrieval-augmented generation using local LLMs (Ollama). github.com/rafidmushfique/CampusCompass
